Koalas don't have much energy and, when not feasting on leaves, they spend their time dozing in the branches. Believe it or not, they can sleep for up to 18 hours a day!

Did you know?

Did you know that elephants can sense storms?

Elephants may be able to detect a thunderstorm from hundreds of miles away, and will head towards it, looking for water.

You can add a little bit more information. But try to not overload your slides with text.

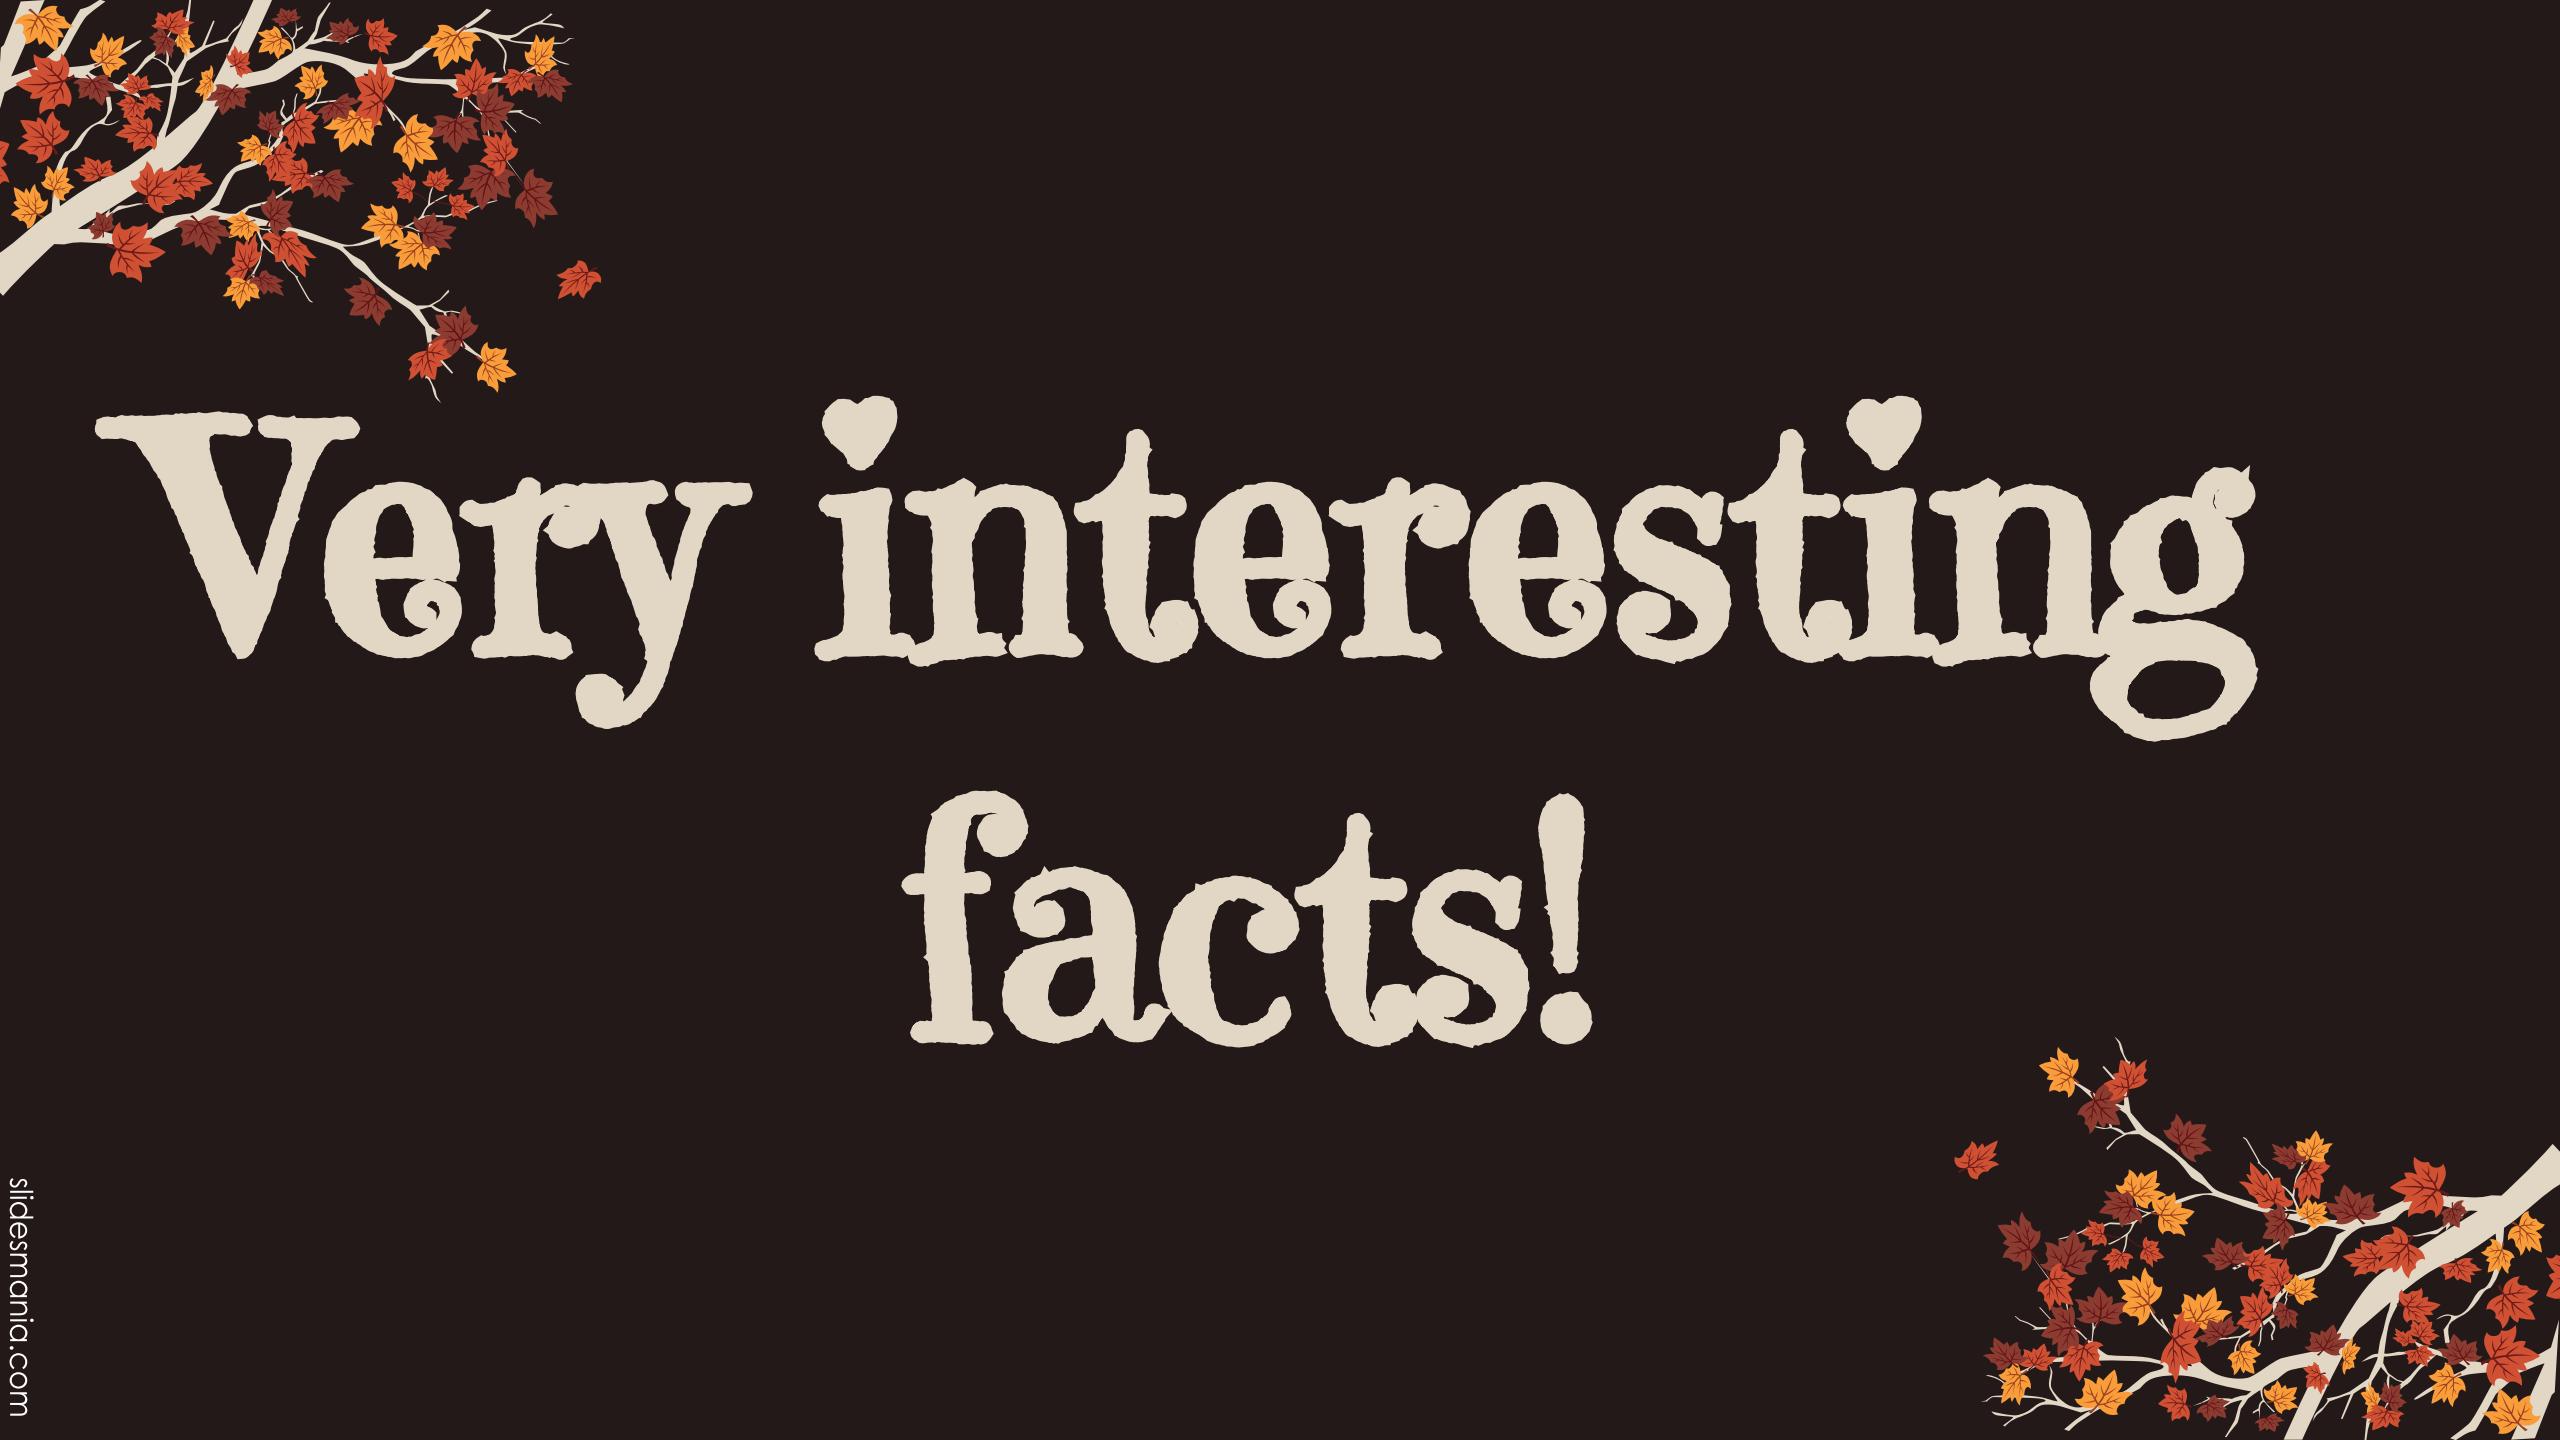

Cats love to sleep.

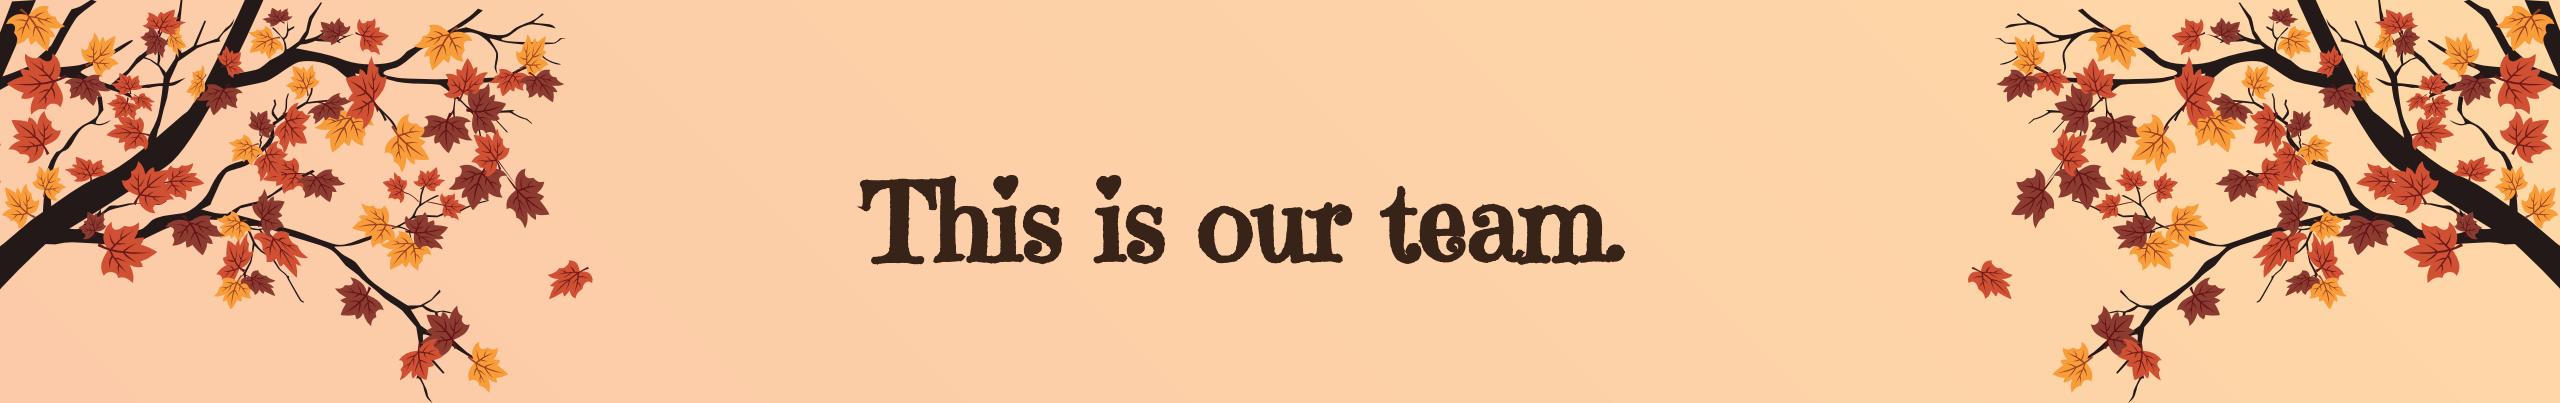

A fifteen-year-old cat has probably spent ten years of its life sleeping.

Also, cats use their whiskers as feelers to determine if a space is too small to squeeze through.

Very interesting facts!

This is our team.
